knowledge's will be enhanced by this course. More over knowledge gained by this course may also prove to be very useful as it covers all essentials information that must be needed for any such start-ups ranging from planning till execution.

This course aims to providing adequate skills required for a establishing particular start-ups/entrepreneurship to candidates. The course is different from traditional academic programmes as it deals more with LIVELIHOOD-based studies rather than focussing on only theoretical knowledge.

One of the biggest advantages of pursuing this course against common certificate courses is that this course follow pattern discussed in new education policy that is ABCDE (Academic bank of credit System for the development of entrepreneurship) that focuses more on practical knowledge than only theoretical one. Apart from this, the work experience candidates gain during the course increases their probability of getting established start-ups with good turn-over.
